- ✓ Double adhesive tape prevents sliding

Q & A

What is the Miracle Bra Pads made of?

It is made of cotton fabric and fluff pulp which is used for absorbing fluids.

Is it safe to use?

Yes. Each production batch of Miracle Bra Pads is independently tested for the microbes count as well as the chemical contents. Furthermore, it is manufactured by an ISO certified factory, which complies with the required international safety standards.

Is it suitable for women with breast tumors or who had breast surgery previously?

The use of Miracle Bra Pads does not affect benign tumors. According to a report conducted by the company in the past, the product can help improve tumor problems without affecting it. If you had breast surgery previously, there may be a slight tingling sensation when using the product, which is helping to recover and repair the breast problem, it is considered as a good improvement response.

Can flat-chested women use for breast enlargement?

There have been cases of breast enlargement, but the increase of breast cup sizes varies from person to person, depending on the individual's body condition and physique.

Who can use?

The Miracle Bra Pads is suitable for females of all ages.

Is Miracle Bra Pads suitable for breast feeding mothers?

Yes. In fact, the bra pad is clinically known to induce the production of breast milk.

Will sweat affect the function of the Miracle Bra Pads energy chip during exercise?

Sweat does not affect the performance of the Miracle Bra Pads, unless it is already soaked, then you have to replace it with a new one. Therefore, we encourage ladies to wear Miracle Bra Pads while exercising.

How often should I change the bra pads?

For hygienic reasons, you should change to a new pair of Miracle Bra Pads everyday.
