Dear Mr. Kwong Choong Lim,

*I am glad to greet you as CEO of BAE International Inc. Sdn. Bhd. as representative GDV Technique in Malaysia, Singapore and Thailand.*

*GDV Technique is a first tool that gave us opportunity to study Energy Fields of different Subjects and, in particular Human Energy fields, and make it easily, reproducibly, graphically and, the last but not the least, inexpensively.*

*At this stage of scientific development these features will contribute to the common trend in biophysics from the comprehension of biological objects as solid stable structures to the perception of their dynamic spatial field essence. That is why we see our task not as a development of one more diagnostic instrument, but as a step to a new understanding of Reality. A lot of scientific institutions, conventional and alternative medical practitioners from different countries benefit from using this technique now.*

*The investigation of BAE Synergy Products done by your organization together with leading expert of GDV Technique Dr. Edward Krizhanovsky opens new prospects for understanding of human nature and its development under unique positive influences.*

*I am looking forward to cooperate with BAE International Inc. Sdn. Bhd. in development of both GDV Technique and BAE Technology in Malaysia, Singapore and Thailand on issues of mutual interest and fruitful collaboration in the future, and wish you much success in growth of your organization.*

*I wish you good health, prosperity and best wishes to you, your family and all your colleagues.*

*Hope to see you in Saint-Petersburg in the nearest future. You are very welcome as our dear guest.*

*Best wishes and kind regards,*

*Dr. Konstantin Korotkov,*

*President of Kirlionics Technology International;*

*Professor of St.Petersburg State University of Informational Technologies, Mechanics and Optics; President of the International Union of Medical and Applied Bioelectrography (IUMAB).*
